

[MS-RPRN]: Print System Remote Protocol

This topic lists the Errata found in [MS-RPRN] since it was last published. Since this topic is updated frequently, we recommend that you subscribe to these RSS or Atom feeds to receive update notifications.

Errata are subject to the same terms as the Open Specifications documentation referenced.

Errata below are for Protocol Document Version [V27.0 – 2015/10/16](#).

Errata Published*	Description														
2016/01/25	<p>In Section 1.7, Versioning and Capability Negotiation, added the Windows build number for Windows 10 and Windows Server 2016 Technical Preview.</p> <p>Changed from:</p> <ul style="list-style-type: none"> ▪ Capability Negotiation: Functional negotiation is supported through the use of Container levels; see section 2.2.1.2. On connection to a server, the client requests a level. If the information level is a level supported by the server, the server is required to process the request. Otherwise, the server has to return an error to the client, and the client would preferably repeat the request with a lower level. <p>Furthermore, to avoid unnecessary network calls, the client determines the server's capabilities by comparing the value returned by the server in the dwBuildNumber member of OSVERSIONINFO (section 2.2.3.10.1) with well-known version-specific dwBuildNumber values.<2></p> <p><2> Section 1.7: The dwBuildNumber value for OSVERSIONINFO and OSVERSIONINFOEX (section 2.2.3.10.2) for specific versions of Windows is shown in the table that follows.</p> <table border="1" data-bbox="410 1136 1414 1289"> <thead> <tr> <th>Version</th> <th>dwBuildNumber value</th> </tr> </thead> <tbody> <tr> <td>Windows 8.1 and Windows Server 2012 R2</td> <td>>= 9431</td> </tr> <tr> <td>...</td> <td>...</td> </tr> </tbody> </table> <p>Changed to:</p> <table border="1" data-bbox="410 1367 1414 1587"> <thead> <tr> <th>Version</th> <th>dwBuildNumber value</th> </tr> </thead> <tbody> <tr> <td>Windows 10 and Windows Server 2016 Technical Preview</td> <td>>= 10586</td> </tr> <tr> <td>Windows 8.1 and Windows Server 2012 R2</td> <td>>= 9431</td> </tr> <tr> <td>...</td> <td>...</td> </tr> </tbody> </table>	Version	dwBuildNumber value	Windows 8.1 and Windows Server 2012 R2	>= 9431	Version	dwBuildNumber value	Windows 10 and Windows Server 2016 Technical Preview	>= 10586	Windows 8.1 and Windows Server 2012 R2	>= 9431
